About me

Full-Stack Engineer specialized in backend systems and generative AI, with hands-on experience building and operating production-grade applications.

I design and implement scalable backend services, real-time conversational systems (voice and chat), and API-driven architectures integrated with enterprise platforms.

I take full ownership of the technical lifecycle from system design and implementation to deployment, monitoring, and continuous evolution combining engineering rigor with product thinking.

Experience

Head of AI Bot Development | Generative AI & Automation

February 2025 / In progress

Mintt Cloud Technology, Madrid

- Lead the architecture, development, and operation of generative AI systems deployed in production environments.
- Design and implement backend services powering conversational voice and chat agents integrated with enterprise platforms and external APIs.
- Build real-time interaction systems combining LLMs, automation workflows, and API-driven integrations.
- Own the full technical lifecycle from system design and implementation to deployment, monitoring, and continuous improvement.
- Work cross-functionally with product, operations, and business teams to translate requirements into scalable technical solutions.

Tech: TypeScript, Node.js, REST APIs, LLM integrations, conversational AI systems, automation workflows

AI Bot Developer | Generative AI & Automation

July 2024 / January 2025

Mintt Cloud Technology, Madrid

- Designed and implemented generative AI solutions focused on process automation and conversational user interaction.
- Developed voice and chat agents integrated with internal systems and external services through API-driven architectures.
- Built automation workflows connecting enterprise platforms, databases, and third-party services.
- Contributed to deploying, testing, and iterating AI-powered systems running in production environments.

Tech: TypeScript, Node.js, REST APIs, conversational AI, automation workflows

Full-Stack Web Developer

February 2024 / June 2024

Melit Technologies, Madrid

- Developed full-stack features for production web applications across frontend and backend layers.
- Built and integrated backend APIs and external services supporting core platform functionality.
- Implemented solutions focused on performance, maintainability, and user experience.
- Collaborated in iterative development cycles following modern software development practices.

Web Developer (Intern)

September 2023 / December 2023

Vortex Dimensión Digital, Madrid

- Contributed to the development of a production web platform used by end users (Feria del Libro).
- Implemented frontend and backend features within a collaborative development environment.
- Strengthened programming foundations while working with real production systems and development workflows.

Skills

Languages & Runtime

Node.js · TypeScript · JavaScript · Python

Frontend

React · Angular · Modern Web Applications

Backend & Systems

API Design · REST APIs · Real-time Systems · WebSockets · Backend Architecture

AI & Conversational Systems

Generative AI · Conversational Agents (Voice & Chat) · LLM Integrations · Prompt Engineering

Data & Integrations

SQL · PostgreSQL · API Integrations · Enterprise Systems

Automation & Workflows

Process Automation · Workflow Design · System Integrations

Additional projects, architectures, and technologies can be explored in my portfolio and GitHub.

Education

Programming "Piscine" (Peer-to-Peer Learning Bootcamp)

2024

42 Madrid, Madrid

- Intensive, project-based program focused on hands-on learning, problem solving, and peer-to-peer collaboration.

Advanced Vocational Diploma in Web Application Development (Full-Stack)

2023

IES Francisco de Goya – La Elipa, Madrid

- Technical training focused on full-stack web development, databases, and deploying applications in real-world environments.

The Bridge (Bootcamp)

2020

The Bridge, Madrid

- Full-Stack Software Development Bootcamp

Additional Training

- *AI & Machine Learning courses*
- *ISO 27001 Fundamentals (Information Security)*

Languages

- Spanish — Native
- English — Professional working proficiency (B2)
- French — Conversational
